

Genotype-by-environment means from aman dataset.  
Red line: arithmetic mean per year. Black line: linear Regression  $y = a + bx$ .

Genotype-by-environment means from aman dataset.  
Red line: arithmetic mean per year. Black line: linear Regression  $y = a + bx$ .

Genotype-by-environment means from boro dataset.  
Red line: arithmetic mean per year. Black line: linear Regression  $y = a + bx$ .

Genotype-by-environment means from boro dataset.  
Red line: arithmetic mean per year. Black line: linear Regression  $y = a + bx$ .
